Card Report Instructions

Thanks for your purchase of a card report. Please let me know which report you'd like.

For compatibility reports, I need the following:
- Gender, First, Last Name of each party
- Birthday, Month, Year

For yearly reports, I need the following:

- Gender, First, Last Name
- Birthday, Month, Year
- Which year do you want?

Please note: Yearly reports work from birthday to birthday, not the calendar year. If your birthday is less than 6 months out from this email, you might want a report for the remaining 6 months of your year. Or next year's report instead?

If your birthday is in June, for example, and you asked for a yearly report in March (3 months earlier) for 2023, such a report would only give you predictions for the last 3 months of your birth year but would include the predictions that started on your last birthday. Or perhaps you want a different yearly report that would cover June to June into 2024, if June is your birth month?

Knowing how these charts work now, please let me know which year to send you. Sometimes people buy 2 reports when there is a big overlap so they can learn about the remaining 3-4 months prior to their birthday and read back over their past birth year to prove accuracy.
For example:
(1) Your current birth year 2023, which would give you news about what unfolded starting on your last birthday and that could have been 4-5-6 months ago.
(2) Or another yearly report that would cover the next 12 months starting at their birthday and year into 2024. Example: If your birthday is June 6, you might want to order a report from June 6, 2023-June 6, 2024.

The reason for this long explanation is to make sure you get what you need. The reports are autogenerated and only work within the birth year---birthday to birthday---not the calendar year. It's often fun and insightful to look back at what the report predicted if you are midcycle in your birth year.

Thank you!
